PARTNERS IN MEDICINE

PRESIDENT'S MESSAGE

Welcome to Partners in Medicine (PIM) at the Penn State Health Milton S. Hershey Medical Center! PIM is dedicated to introducing our members and their spouses to one another while offering an outlet for networking, coordinating social activities, and facilitating friendships. We support each other and our greater community through acts of service.

PIM is a group comprised of spouses and significant others of residents, fellows, medical students, and new attending physicians (during their first 3 years at Hershey) of all specialties at the PSH Milton S. Hershey Medical Center. Although we come from various backgrounds and perspectives, we share a common bond: the medical journey.

The 2022-21 year has already brought several new changes! For the first time in our history, we are including medical students, fellows, and brand new attendings. This expansions allows us to more closely follow our group's goal to provide support to all stages of this medical journey. We have also created a dedicated diversity committee; who has already done incredible job facilitating conversations and education for our members.

If you are interested in finding out additional information or need someone to network with please email us at PIMHershey@gmail.com. This applies to candidates and/or their spouses who are currently interviewing for residency and fellowship at Penn State Health.
